

**HK CORPORATION**

Your Trusted Partner in Electrical Excellence

**Smarter Future  
Begins with  
HK Corporation**

# About Us

HK Corporation is a leading dealer, supplier, and distributor of a wide range of industrial automation components and electrical control solutions. We provide top-quality products and services that help industries enhance performance, reliability, and efficiency.

## Why Choose us:

- ✓ 1000+ SKUs in stock
- ✓ Certified engineering team
- ✓ ISO-compliant manufacturing
- ✓ Custom panel solutions
- ✓ Fast delivery across India

We proudly stock and supply products from globally recognized manufacturers such as Delta, Panasonic, Baumer, Finder, Phoenix Contact, PILZ, Fuji Electric, and many more. Our robust inventory and well-established distribution network enable us to efficiently serve customers across India and international markets, delivering high-quality solutions for industrial automation and control.

## Our Mission, Vision & Values

### Mission

To empower industries with cutting-edge automation and control solutions, helping them enhance productivity, efficiency, and safety.

### Vision

To be a leading automation solutions provider known for quality, innovation, and customer-centric service in India and globally.

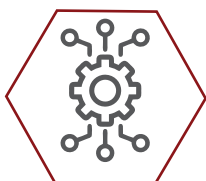

### Values

We are driven by quality, integrity, and a customer-first mindset—delivering innovative and reliable automation solutions.

## Why Partner With Us

**Extensive  
Product Range**

**Authorized  
Distribution**

**Experienced  
Team**

**Tailored  
Solutions**

**Fast  
Turnaround**

**After-Sales  
Support**

# Design & Manufacturing of All Types of Electrical Panels

**HK CORPORATION**  
Your Trusted Partner in Electrical Excellence

We specialize in the end-to-end design, engineering, and manufacturing of a wide variety of electrical panels tailored to meet industrial and commercial power distribution and automation needs. Our panels are manufactured using high-grade components, adhering to stringent quality standards and electrical safety regulations.

## ■ Our Panel Manufacturing Solutions

- PCC, MCC AND DISTRIBUTION PANELS
- PLC AUTOMATION PANELS (PLC + HMI)
- VFD PANELS
- APFC PANELS
- RELAY LOGIC PANELS
- FSP, MSP, SFU AND BBC PANEL
- SOLAR ACDB AND DCDB (UPTO 1Megawatt)
- CUSTOMIZE PANEL SOLUTIONS

## Industrial plug socket solution

We offer a wide range of industrial-grade plug and socket systems designed for safe, reliable, and efficient power connections in demanding environments such as factories, construction sites, marine areas, and commercial setups. These plugs and sockets are built to handle high current (16A to 125A) and high voltage (up to 690V), with protection ratings ranging from IP44 to IP67, ensuring safety against dust, water, and mechanical stress.

# SERVO CONTROL AIR COOLED VOLTAGE STABILIZER (up to 150 kva)

**HK CORPORATION**  
Your Trusted Partner in Electrical Excellence

H K Corporation is one of the leading manufacturer of servo controlled voltage stabilizers for more than 15 years. This equipment is used to obtain a steady three phase AC supply within very close tolerances to a fluctuating mains. This equipment finds application in Dairy industry. Chemical, Process Industry, Research Establishment and Hospitality industry etc. We have over 10,000 installations in just last 7 years have become one of the preferred suppliers to dairy industries, gear manufacturing industries.

## ENEFITS OF "H K Corporation" MAKE SERVO STABILIZERS :

**REDUCTION IN BREAKDOWN OF ELECTRICAL EQUIPMENTS:** UP TO 70% depending upon the input voltage variation and working hours of the plant which will result in zero breakdown and better utilization of manpower & equipments.

**ENERGY SAVING:** 5-25% depending upon the input voltage variation and working hours of the plant.

**GUARANTEE:** Our Servo stabilizers are warranted for 1 year unconditionally after installations at site. We have wide spread service network in most of the states in India and we provide services at site our clients for any complaints.

**REDUCTION IN MDI:** There will be definite reduction in MDI by 10-15% after the power factor by 10-15% after the installation of the equipment.

**IMPROVEMENT IN POWER FACTOR:** Improvement in the power factor by 10-15% can be achieved as the output supply will be stable.

**EFFICIENCY:** "H K Corporation" make Servo controlled voltage stabilizers are 98.5% efficient compared to other conventional Servo stabilizers.

**LOAD:** "H K Corporation" make Servo controlled voltage stabilizers are manufactured for unbalanced load or Balanced load as per customer requirements.

# SERVO CONTROL OIL COOLED VOLTAGE STABILIZER (upto 2000 kva)

## PROTECTION

Over Voltage Protection  
Phase Reversal Preventer  
Under Voltage Protection  
Short Circuit Protection  
Single Phasing Preventer

## CONTROL SYSTEM

Plug in type Micro processor based control card for high reliability, accuracy & easy maintenance.

## MS ENCLOSURE

Spacious pipe structure design duly powder coated for easy maintenance with wheels for smooth movement.

## DISPLAY & INDICATION

**VIF Indicator:** This digital display gives the information of voltage, current and frequency of the all phase for both input and output.

**Trip Indication:** Trip indication for individual phases for both undervoltage and overvoltage condition.

**InLow or InHigh Voltage:** Mains incoming indicator Neon lamp for all phase.

**Error Loggings:** Fault + Error Log with Time & Date.

# Product Range

**HK CORPORATION**  
Your Trusted Partner in Electrical Excellence

## ■ AC DRIVES, SERVO, STEPPER MOTOR

We offer a complete range of variable frequency drives (VFDs), servo systems, and stepper motors for precise speed, torque, and position control. These solutions are ideal for automation, robotics, conveyors, and CNC machinery. Energy-efficient and programmable for dynamic industrial motion applications.

## ■ SMART INVERTER

A Smart Inverter is an advanced power backup system that intelligently manages electricity flow between grid, battery, and solar input. It offers features like automatic voltage regulation, energy optimization, and remote monitoring via mobile apps.

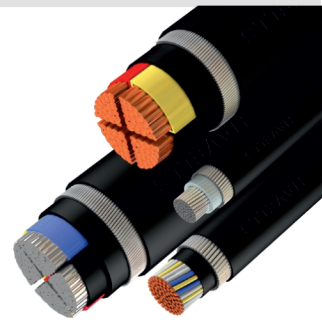

## ■ UPS-Uninterruptible Power Supply

Our UPS systems ensure continuous power during outages or voltage drops. Online UPS provides zero transfer time with double-conversion, while offline types are economical for basic needs. Essential for IT systems, hospitals, banks, and industrial controls.

## ■ LT & HT CABLE

We supply low and high tension power cables for industrial and utility-grade distribution. Options include copper/aluminium cores with armored or flexible sheathing for protection. Used in power plants, substations, and heavy-duty industrial environments.

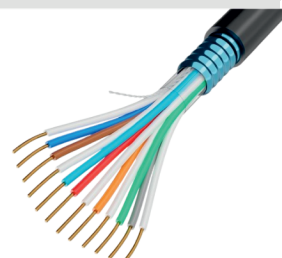

## ■ INSTRUMENT CABLES

High-quality signal cables designed for process automation and instrumentation. Shielding and twisted pair construction reduce electromagnetic interference (EMI). Widely used in PLCs, SCADA systems, DCS panels, and analytical equipment.

## ■ COMMUNICATION CABLES

Reliable cables for transmitting voice, data, and video signals across various systems. Used in structured cabling, CCTV, industrial Ethernet, and telecom applications. Available in twisted pair, coaxial, and fiber optic variants.

# Industries We Serve

**HK CORPORATION**

## ■ ENCODERS

Position and motion sensors that provide digital feedback to control systems. Incremental encoders offer relative positioning, while absolute encoders give unique values for every position. Resolvers are ideal for harsh environments requiring rugged analog feedback.

## ■ PRESSURE AND TEMPERATURE TRANSMITTERS

Devices that convert pressure and temperature measurements into standardized signals (4-20mA, 0-10V). Essential for real-time monitoring and process control in automation systems. Suitable for water treatment, oil & gas, HVAC, and manufacturing industries.

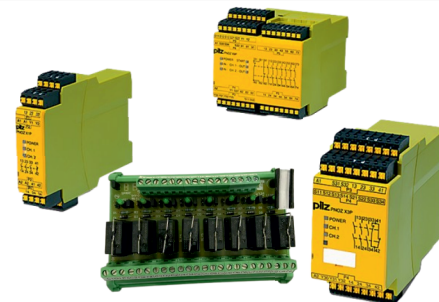

## ■ SENSORS

We offer a wide variety of industrial sensors for detection, positioning, and object recognition. Includes inductive, capacitive, photoelectric, ultrasonic, and laser sensors. Reliable performance in automation, packaging, food, pharma, and machine safety.

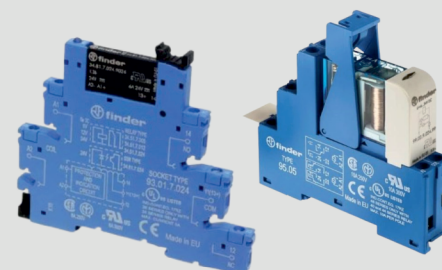

## ■ RELAYS

Our relay range includes safety relays, control relays, and power protection devices. They ensure safe switching, circuit control, overload protection, and fault detection. Used in automation panels, process safety systems, and industrial machines.

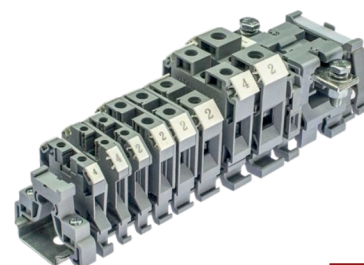

## ■ FINDER RELAYS

Finder Relays are high-performance switching devices widely used in industrial automation for controlling circuits with precision and reliability. Known for their durability and compact design, they are ideal for applications like signal switching, load management, and system protection in automated systems.

## ■ POWER AND CONTROL TERMINALS

Terminals for safe and efficient electrical wiring in power and control systems. Support multiple conductor types with screw or spring clamp mechanisms. Ideal for switchboards, distribution panels, and industrial automation cabinets.
